

# Circular Marketplace Türkiye

Building Markets has established a robust network of over 3,100 local businesses in Türkiye, fostering training, mentoring, and market access. Our efforts have resulted in transactions worth US 46 million and the creation of approximately 4000 full-time equivalent jobs. Despite these successes, environmentally friendly waste management remains a challenge in Türkiye.

Building Markets in Türkiye aims to revolutionize waste management practices through the circular marketplace initiative, promoting sustainable solutions, circular economy principles and providing coordinated support for recycling businesses to address ecosystem gaps.

Are you interested in being part of the recycling supply chain?

Do you face challenges in waste disposal or management?

Are you looking to expand your market reach and customer base?

## Why Join Us?

**Financial opportunities:** Unlocking new revenue streams and market opportunities

**Market Connections:** Access new markets and customers through our network and matchmaking events.

**Capacity Building:** Enhance your skills and knowledge through specialized training and workshops.

### Capacity-Building Workshops:

Gain insights and skills in sustainable production, waste management, and resource optimization.

### Visibility and Recognition:

Gain visibility and credibility as a leader in circular economy practices.

### Market Connections:

- Attend matchmaking webinars and in-person events.
- Connect with recyclers and waste producers

## Join Us:
